# TENNIS COURT WINDBREAKS

- TENNIS COURT WINDBREAKS is made of polyethylene. Blocks 50% of view and provides good privacy protection that allows air passage. The knitted construction resists tearing and fraying.
- The primary function of Tennis Court screen is protection from view and wind. The Tennis Court Windbreak is the most common in green colour with simple white or black print. This achieves as little conspicuousness as possible and does not interfere with the tennis player during the match.
- Above that, LOKET can offer the clients tennis court in two more colours, yellow and blue.
- Standard dimensions are 2m x 12 m and 2 m x 18 m, but we can produce a custom size net at the client's request.
